Lincoln Boulevard Closed between Storey Avenue and McDowell Avenue, December 28 through 31, 2009

Starting Monday, December 28 through Thursday, December 31, Lincoln Boulevard will be closed between Storey Avenue and McDowell Avenue in order to conduct tree removal activities. A detour will be provided via Cowles Avenue, McDowell Avenue and Crissy Field Avenue during this closure.

Please see the map below for details.

Please be cautious when traveling around construction sites and follow instructions from traffic controllers and construction signs. All dates are subject to change due to weather and unforeseen conditions.

We appreciate your patience during this activity.

Intermittent Traffic Control on Lincoln Boulevard between Crissy Avenue and Storey Avenue January 4 through March 2010

TRAIL BETWEEN LINCOLN BOULEVARD AND MCDOWELL CLOSED DURING THIS ACTIVITY

From January 4 through March 2010, there will be roadwork and utility relocation activity to realign Lincoln Boulevard between Crissy Avenue and Storey Avenue. Lincoln Boulevard must be realigned in order to construct the new off-ramp from northbound Highway 1/Park Presidio to southbound Doyle Drive/Highway 101.

There will be intermittent one way traffic control between Crissy Avenue and Storey Avenue during this activity. People traveling through this area should expect occasional delays.

The multi-use trail between Lincoln Boulevard and McDowell Avenue will be closed during this activity.
ABOUT THE DOYLE DRIVE REPLACEMENT PROJECT
The replacement of Doyle Drive with the Presidio Parkway is a collaborative effort led by the California Department of Transportation, the San Francisco County Transportation Authority, and the Federal Highway Administration.

Doyle Drive is structurally and seismically deficient and must be replaced. The roadway is facing the same problem that threatens other crucial components of the nation’s infrastructure – the ravages of time and continual use. Originally built in 1936, Doyle Drive has reached the end of its useful life. The Presidio Parkway is based on a world-class design that will improve the seismic, structural and traffic safety of the roadway. It also will be more sensitive to community needs and to the national park setting, reducing impacts on biological, cultural, historical and natural resources and on the surrounding neighborhoods.

Highlights of the new design include:
- A parkway with two short tunnels, a wide landscaped median, traffic calming transitions to city streets and the inclusion of safety shoulders
- A spectacular regional gateway that respects the natural contours of the surrounding area and complements the unique environment of San Francisco and the Presidio, a national park
- New direct access to the Presidio and enhanced views
- A more centralized location for transit connections
- Enhanced pedestrian connections within the Presidio to the Main Post, Crissy Marsh, the National Cemetery and historic batteries
- Reduced light and noise intrusion at Crissy Field.

CONSTRUCTION OVERVIEW
Construction of the Doyle Drive replacement, the Presidio Parkway is underway and began more than a year ahead of schedule, due to $50 million from the American Recovery and Reinvestment Act of 2009.

Construction of the new roadway will take approximately four years to complete. An ongoing series of advisories will update the public about what to expect as work progresses.

CONSTRUCTION MILESTONES

- **Major Construction Begins-December 2009**
  - Traffic remains on existing Doyle Drive until 2011
- **Seismic Safety Achieved-2011**
  - Traffic is transferred onto a portion of the new southbound roadway and a temporary bypass adjacent to the existing Doyle Drive
- **Substantial Construction Complete-2013**
  - Traffic is transferred onto the final Presidio Parkway
- **Project Complete-2014**
  - Landscaping and final design details are complete
