Northbound and southbound traffic on Highway 1 have been shifted to the newly completed section of the Ruckman Bridge. This shift allows traffic to continue moving while the rest of the Ruckman Bridge is built.

Due to this new alignment, the first 400 feet of the ramp from southbound Hwy 101/Doyle Drive to southbound Hwy 1/Park Presidio Boulevard has been reduced to one lane until June. The roadway returns to two lanes before the MacArthur Tunnel.

Drivers should be aware of the new roadway alignment and merge. See the image below for the temporary traffic alignment.
